

RESEARCH
PROGRAM ON
Dryland Systems

The CGIAR Research Programs (CRPs)

Richard Thomas CRP-Dryland
Systems Director

ICARDA, Jordan

October 3, 2015

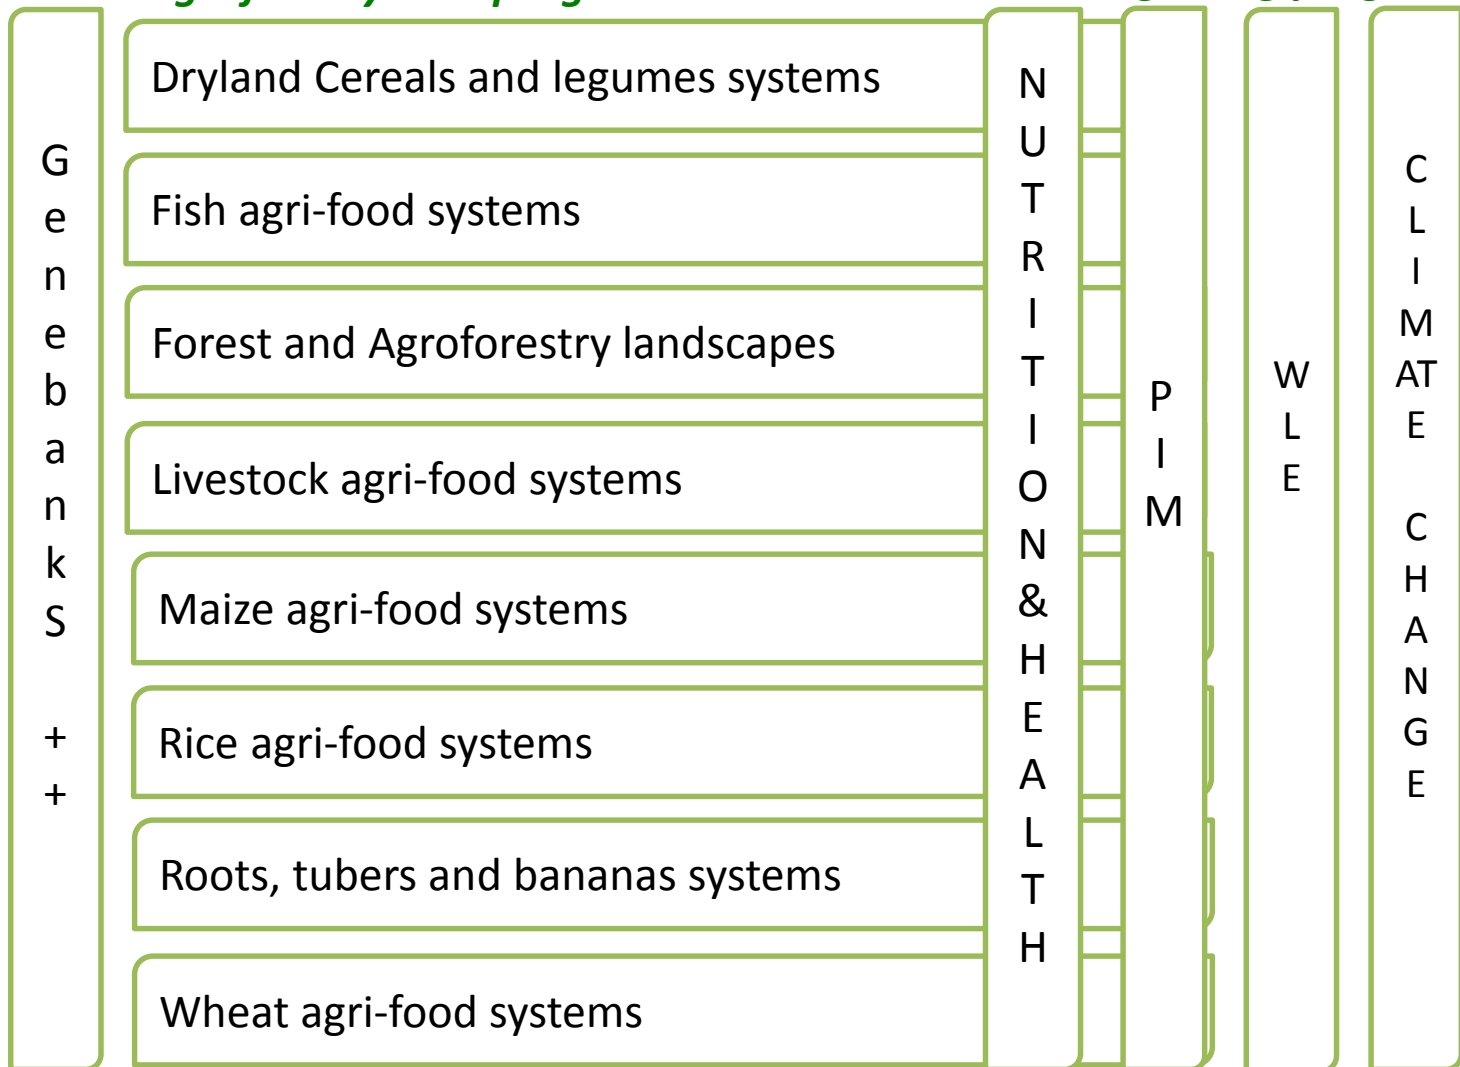

The CGIAR and partners:

- Bring together thousands of scientists for multidisciplinary research on problems in poor and under-served agro-ecosystems;
- Links farmers and national agricultural research and innovation systems with the networks of Research Centers
- Holds genetic resources for agriculture in trust for current and future generations.

Wheat	Rice	Maize	Livestock
Fish	Roots, tuber & bananas	Dryland cereals & legumes	Forests, trees & agroforestry
Agriculture for nutrition & health	Policies, markets & institutions	Water, land & ecosystems	Climate change, agriculture & food security

Agri-food system programs

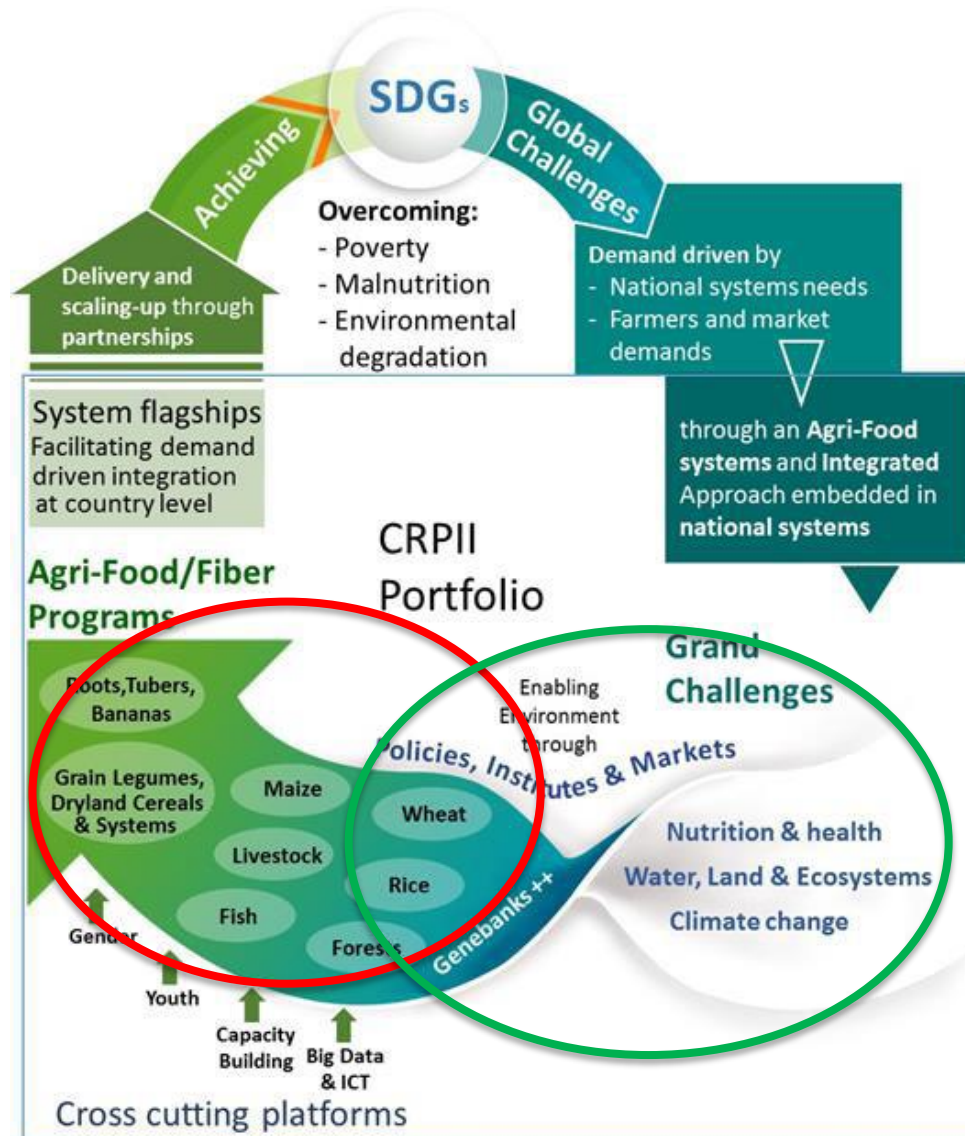

Global integrating programs

Coordinating programs / platforms

The new proposed CGIAR portfolio

Through these 13 Research Programs we improve:

- yields and profits of crops, fish, trees and livestock
- sustainability and environmental integrity, adapt to and mitigate climate change
- the productivity, profitability, sustainability, and resilience of entire farming systems
- policies and markets
- nutrition and diets and,
- manage and sustain crop collections

Strategic Research Framework of the CGIAR 2016-2025

RESEARCH
PROGRAM ON
Dryland Systems

System level outcomes	Reduced poverty	Improved food & nutrition security	Improved natural resource systems & ecosystem services
Intermediary Development Outcomes	<p>Increased resilience of poor to climate change & other stresses</p> <p>Enhanced smallholder market access</p> <p>Increased incomes & employment</p>	<p>Improved productivity</p> <p>Improved diets for poor & vulnerable</p> <p>Improved food safety</p> <p>Improved human & animal health through better agricultural practices</p>	<p>Natural capital enhanced & protected</p> <p>Enhanced benefits from ecosystem goods & services</p> <p>More sustainably managed agro-ecosystems</p>

- Dryland systems
- Dryland cereals
- Grain legumes
- Wheat
- Water, Land & Ecosystems
- Policies, Markets & Institutions
- Livestock & fish

- ICARDA
- CIMMYT
- IWMI
- Bioversity
- IFPRI
- World Fish
